1975 CONSTRUCTION DESK DIARY FROM THE EDITORS OF ENGINEERING NEWS-RECORD

This elegant and utilitarian 1975 Desk Diary contains 64 pages of useful information about the construction industry . . . taken directly from the pages of Engineering News-Record. It provides answers to the questions most frequently asked of ENR's editors: the highest, widest, biggest, largest . . . bridges, dams, tunnels, etc. A partial listing of the contents of the special section on construction includes:

- The ENR Construction Cost Index 1903-1974
- The ENR Building Cost Index 1913-1974
- Almanac of construction milestones in the past 100 years
- ENR's listing of largest 400 U.S. Construction Firms
- ENR's listing of top 500 Design Firms
- Listing of largest design-construct firms, and largest foreign contractors
- Names and addresses of the most important construction associations and a calendar of their 1975 meetings

This handsome 1975 Construction Desk Diary is bound in rich, red, simulated leather padded covers. It has a practical 14-month appointment calendar with each week displayed across two full pages. There is ample space for margin notes and daily expenses, plus a weekly expense summary.

This is truly the most useful and impressive desk diary ever produced for the construction industry. Order copies now for yourself—and for business gifts—at the low price of $11.95 postpaid.

CONTENT

Part I—Subject Index

The index includes all articles that have appeared within the dates covered, with the exception of certain Briefs (such as Labor Briefs, Careers) and Obituaries.

The subject headings under which all articles are indexed appear in alphabetical order. Within the subject headings the entries are listed chronologically.

Many important headings are divided into subheadings, for example, BRIDGES—by states or countries; CITIES—by name; BUILDINGS—by type (churches, garages, etc.).

International coverage is shown under the letter "I." The items here listed geographically also appear under the appropriate subject headings.

Part II—Names

Part II of the index contains names of authors, personalities, and companies. Listed here are the names of people who are the subject of articles; names of authors of by-lined articles and published letters; and names of firms about which articles were written.

Individuals or firms simply mentioned in feature articles about various construction projects are seldom indexed by name. Those, on the other hand, who are listed under **Names** will usually not appear under the subject heading. For example, an article about the Smith Construction Co. appears only in the **Names** section and will not be found under the heading CONTRACTORS.

Part III—Product Manufacturers

Items that describe new materials and equipment, including Product Briefs, are indexed under this heading, by manufacturer's name.

TERMS USED

See means that all entries on the subject will be found under another heading: EXCAVATING, **see:** SOIL.

See also means that a related heading should also be checked: SEWAGE, **see also**: WATER POLLUTION.

The following abbreviations and signs are used:

RC —Reader Comment
CW —Construction Week
WO —Washington Observer
B —Brief and Around the World
e —Editorial
** —Article with several illustrations
* —Illustrated article (if asterisk precedes entry, reference is to a picture with caption only.)

ENGINEERING NEWS RECORD is published every Thursday. There are 25 or 26 issues in each half-yearly volume, covering January to June and July to December, starting with vol. 78 in 1917, when ENGINEERING NEWS and ENGINEERING RECORD joined forces under the present title.

THE ENR 1974-75

Directory of Contractors

THE ENR 1974-75

Directory of Design Firms

They guide you quickly and conveniently to a diversity of leading contractor and design firms that may offer exactly the capabilities, experience, and resources that match your design and construction needs. In these directories:

- Two-page "information units" supplied by 91 contracting firms, 146 design firms, detailing and illustrating the types of construction they design or construct, their experience and range of services, headquarters and other offices, subsidiary firms, executive staffs, etc.
- Indexes of participating firms by office locations
- Alphabetical indexes of participating firms
- Indexes of participating firms by types of jobs handled
- The 400 largest U.S. contractor firms as reported by ENR in 1973
- The 500 largest design firms as reported by ENR in 1973
- The 10-year and 9-year lists of leading contractor and design firms, respectively, as reported by ENR in its annual TOP 400 and TOP 500 issues.

Copies of each Directory are available at $9.95 each. They will more than earn their cost the first time you use them. Order one or both Directories in any desired number.
